ABOUT ME

I am a highly skilled System Engineer with over two decades of extensive experience building and supporting stable and secure environments. I like challenging tasks and respect esprit de corps.
In my former life, I volunteered as a "LizaAlert" SAR team member.

WORK EXPERIENCE

SYSTEM ENGINEER

SOFTSWISS | TBILISI, GEORGIA
MAR 2022 - DEC 2023

Company profile: iGaming platform as a service.

I was a part of the Infrastructure operations team.

Participated in recruiting interviews, estimating technical and soft skills, and mentored new teammates. Participated in on-call rotations to address production-level issues; investigated and composed RCAs. Maintained IaC and documentation for thousands of bare-metal and virtual servers and documented changes. Communicated with managers and developers to resolve complex tasks and issues. Developed and maintained monitoring and alerting systems. Occasionally revised security approaches for production infrastructure and personnel access.

Tech stack: Cloudflare, some AWS products; Saltstack, Terraform; Gitlab CI; Bash, and some Python scripting; Nginx, PostgreSQL, and Zabbix.

DEVOPS ENGINEER

VSEMARYI.RU | NOVOSIBIRSK, RUSSIA
NOV 2020 - DEC 2022

Company profile: Internet shop selling custom merchandise goods.

I was a part of the core level IT team.

Duties: Infrastructure and product availability monitoring, software development workflow support and management, infrastructure management, IaC development, and support.

Stack and skills: k8s, Linux, prometheus+grafana+clickhouse, bash and python scripting, GitLab ci/cd, ansible, MySQL/PostgreSQL/MongoDB, dev support, troubleshooting

DEVOPS ENGINEER

SUPL.BIZ | TOMSK, RUSSIA
NOV 2019 - JUL 2020

Company profile: B2B internet marketplace.

Supporting migration of main company product to microservices architecture, searching for "bottlenecks", and site workload capability scaling.

Skills and technologies: Nginx, GitLab, Drone CI,

Consul+Fabio+Unbound+Portainer, PostgreSQL, Redis, RabbitMQ, Sentry, Prometheus+Grafana

DEVOPS ENGINEER

BANK OF RUSSIA | TOMSK, RUSSIA
JAN 2019 - NOV 2019

SKILLS

System Administration

Linux

Problem Solving

Infrastructure As Code

Communication

Systems Management

Teamwork

Mentoring

Technical Recruiting

There's not much I can tell about this position. I've been creating and modifying CI/CD pipelines, troubleshooting it; writing IaC; monitoring staging, testing, and production environments, and documenting all changes and legacy pieces.

Tech stack: Ansible, Terraform, Jenkins, GitLab, Prometheus, Grafana, PostgreSQL, Bash scripting

Splunk, IBM WAS, Oracle DB

SYSTEM ENGINEER

TOMSK STATE UNIVERSITY | TOMSK, RUSSIA

NOV 2011 - JAN 2019

All in one. Rebuilt the faculty network from scratch: tons of new gigabit wirings, 10Gbit/s LACP links to distribution and core levels, Cisco-based network, VLANs, external VPN access, VoIP, VMWare vSphere cluster with AD services, VMWare Horizon VDI infrastructure, and fool-proof Linux environments for educational purposes.
